

Teach My Kid to Read equips librarians and library systems with practical, evidence-aligned strategies to support early and striving readers.

This PD is designed for public libraries, library systems, and state library leadership seeking research-aligned professional learning.

Each session includes a 45-minute presentation, followed by 15 minutes for Q&A.
Sessions may be delivered individually or combined into extended presentations.

Most sessions range from \$900– \$1,200.

A formal proposal with goals, objectives, deliverables, and pricing is provided upon confirmation of scope.

1. The Science of Reading for Librarians

- How children learn to read
- The Simple View of Reading
- Why schools are shifting to evidence-based curricula & how libraries can complement that shift
- The library's role in ensuring equitable access to high-quality reading resources

2. Evaluating Books for Beginning Readers

- Understanding the definition and purpose of decodable books, leveled readers & authentic texts
- Identifying high-quality decodable materials
- Shelving and signage as passive readers' advisory
- Guiding families in choosing and using decodable books with confidence.

3. Implementing Literacy Solutions in the Library

- Strengthening school and family partnerships through library-centered literacy resources & programming
- Designing programming that supports both decoding and comprehension
- Curating resources for homeschoolers and caregivers
- Creating unique community literacy solutions
